F16 Intuition Tailored to your Success

SLENDER. ELEGANT. PERFECTLY BALANCED.

With the lowest profile receiver on the market, the F16 forms the ideal basis for a shotgun that is perfectly tailored to the needs of the huntress – both for hunting and clay shooting.

Its name speaks for itself: F16 Intuition.

A special buttstock that is tuned to the female anatomy along with the pistol grip designed for slender ladies' hands allow for effortless mounting of the shotgun. Perfect balance and fit lead to softer felt recoil, comfortably keeping you on target. The F16 Intuition boosts self-confidence and leads to natural intuitive shooting. Huntress and shotgun instantly become one.

PERFECTED TO THE SMALLEST DETAIL

- **Monte Carlo stock design:**
The higher comb creates a perfect balance for both shoulder and cheek when mounting; Allowing cheek and eye to find the optimum position.
- **Reduced pitch angle:**
Ideal fit of the stock on the shoulder, perfectly adapted to the female anatomy.
- **Extra soft recoil pad:**
Excellent recoil characteristics.
- **Reduced stock length:**
Smooth mounting allows for relaxed shoulder and arm posture.
- **Ergonomically optimized pistol grip:**
Ideal ergonomics between pistol grip and trigger are designed for a women's hand.

F16 The NEW shotgun class

BEST POINTABILITY

The lowest profile receiver on the market provides an exceptionally low centre of gravity for the shotgun. Its outstanding balance and the noticeable pointability immediately lead to better shooting.

FUNCTIONAL DESIGN

The elegant "Semi Round Body" action makes the F16 a dynamic companion. The forearm highlights the design of the gun perfectly and hides the functional elements – leaving the hand of the shooter to solely feel the delicate checkering as well as the noble haptics of the wood.

FASTER SHOOTING

The thought impulse to ignition is rapidly implemented due to the impressively crisp trigger and the very fast lock time. The newly developed tapered rib supports the peripheral vision of the shooter and enhances quick target acquisition.

EXTREMELY DURABLE

The innovative monocoque action which boasts a superb surface finish, high-strength materials and further technological innovations are the best prerequisites for a durable and long-lasting shotgun.

RELIABLE IN EVERY SITUATION

The Blaser Inertial Block System (IBS®) adds to shooter safety and comfort by preventing the ability for the shotgun to fan fire or double. The proven Ejection Ball System (EBS®) cocks the ejectors only when the shot is fired and are not under tension after ejecting the cases. This leads to unlimited durability and consistent ejection force.

CONCENTRATING ON THE ESSENTIALS

The EBS® has another distinct advantage: shooter comfort is paramount so why would you want to force your gun closed to cock the ejectors? So relax shoot a Blaser and concentrate on what is really important, which is hitting the next target! Weather in the field or on the course the F16 is up to the challenge.
